EXPERIENCE

Production Software Engineer - Career Experience

June 2026 – Nov. 2026

Apple

San Diego, CA

- Building deployment workflow tooling and stage management systems in **Swift** for the Platform Apps and Technologies team, enabling internal engineering teams across Apple to ship services reliably at scale on **Kubernetes**.
- Scoping ownership of the internal deployment dashboard, including a refreshed UI and a new analytics view to surface deployment failures earlier and reduce time-to-detection for customer teams.

QA Automation Software Engineer Career Experience

Jan. 2025 – July 2025

Apple

San Diego, CA

- Reduced team debugging time by **30–40%** by architecting a Chaos Client using **ToxiProxy** to simulate targeted network failures, latency spikes, and service degradation against distributed systems in a continuous integration environment.
- Designed fault injection scenarios that exposed hidden dependency failures and latency bottlenecks previously undetected in testing.

Technical Specialist

Oct. 2025 – Present

Apple Retail

La Jolla, CA

- Diagnosed and resolved complex hardware, software, and account-level issues across the full Apple lineup with consistent **first-contact resolution** and **above-average satisfaction ratings**.
- Reduced customer follow-up case frequency by educating customers on device features, troubleshooting methodologies, and account workflows.
- Reduced customer wait times by streamlining device check-ins and repair pickups, coordinating with technicians during high-traffic hours.

iOS/macOS Support Advisor

Jan. 2024 – Oct. 2025

Apple Support College Program

San Diego, CA

- Resolved iOS and macOS hardware, software, and account-level issues across phone-based support, escalating distributed system and account infrastructure issues for root-cause investigation.
- Delivered remote support reflected in **above-average satisfaction ratings**, lowering follow-up case frequency by educating customers on new and existing features.

PROJECTS

ClearCut | *Swift, SwiftUI, SwiftData, Swift Charts, CloudKit, UserNotifications*

2026

- Built a personal finance iOS app with **CloudKit**-backed sync across devices and **SwiftData** persistence.
- Created native **Swift Charts** visualizations for spend patterns and local notifications for budget alerts.
- Added CSV import to bring in transaction history.

2048 AI Agent | *Python, NumPy, PyTorch, FastAPI*

Aug. 2024 – Oct. 2024

- Implemented an **Expectimax** search algorithm with board heuristics and pruning logic, improving decision speed and tile evaluation across probabilistic game states.
- Built an automated logging pipeline to export move sequences and game statistics for post-game analysis.
- Developed a real-time **FastAPI**-served visualization layer for board state, move selection, and score.

Classly | *Swift, SwiftUI, WidgetKit, Core Data*

Jan. 2026 – Present

- Built an iOS home screen widget surfacing live class schedule data with **Core Data** persistence and **WidgetKit** refresh cycles.
- Designed adaptive SwiftUI components targeting multiple widget size classes and device types.

EDUCATION

San Diego State University

San Diego, CA

Bachelor of Science in Computer Science, Minor in Statistics, Minor in Mathematics

TECHNICAL SKILLS

Languages: Swift, Python, Java, JavaScript, C#

iOS & Apple Frameworks: SwiftUI, WidgetKit, SwiftData, Swift Charts, CloudKit, UserNotifications, Xcode, Instruments

Backend & Infrastructure: Server-side Swift, Kubernetes, Docker, REST APIs, CI/CD, distributed systems

Data & Libraries: PyTorch, NumPy, Pandas, FastAPI, Matplotlib, Git
